### **DETAILED ACTION**

1. The following restriction is in response to the communications received 02/09/06.  
Claims 11-33 and 38-45 have been withdrawn. Claims 1, 5, 34, 35, and 46 have been amended and claims 49-58 have been added. Claims 1-10, 34-37, and 46-58 are pending and subject to the following restriction requirement, as necessitated by amendment.

#### ***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species:  
**Species I:** Paint Department Optimizer tool that tabulates the data associated with painting repair orders. See pages 32-35 of the specification and figures 13A, 13B, 13CA, 13CB, 13DA, 13DB, 13EA, 13EB. (Claims 5, 34-37, 49)  
**Species II:** performing process audits using checklists, scorecards, and process audit business tools. See pages 40-41 and figures 16A-16DC. (Claims 50-58)  
**Species III:** Generating and furnishing a survey, such as an insurance rating system survey. See figures 8A-8BC, pages 17-19. (Claims 46-48)

The species are independent or distinct because species I, II, and III are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the three processes do not overlap in scope, are not obvious variants, and are materially different. Species I is a Paint Department Optimizer tool used specifically by a paint department to tabulate the money, supplies, etc. associated with painting repairs. Species II discloses a separate tool

Art Unit: 3623

that performs process audits by using business tool scorecards that link to a checklist for an area of the business. Areas are rated and scores are output in various forms. There is no calculation or tabulation of data associated with the action of painting repair, such as money and supply.

Species III discloses furnishing a survey to a business based on the profile of a user, where an insurance company rating system allows a user to determine which programs to work with and what actions should be taken to market the programs. There is no discussion of tabulating paint repair data or auditing using a scorecard. These distinctions are supported by the specification, which discloses each species as a separately usable tool, as set forth above.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4 and 6-10 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 3623

3. A telephone call was not made to request an oral election to the above restriction requirement because the restriction requirement is deemed to be complex.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Upon cursory review of the claims and the specification, Examiner notes that the current amendment to claim 1, element (f), does not appear to have support. Examiner respectfully requests Applicant's consideration in the response to this action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beth Van Doren whose telephone number is (571) 272-6737.

The examiner can normally be reached on M-F, 8:30-5:00.
